

ROBINSON R-22 IN FLIGHT

Discovery Flights

Still not sure about flying a helicopter? Schedule a discovery flight -- a 30 minute helicopter lesson to see what it's all about.

Helicopter Ground School

Save money, time, and get great results with our ground school. You don't need to be enrolled in flight training to apply. Many people try the ground school to see what's involved in flight training! New classes start every few weeks.

North Andover

FLIGHT ACADEMY

Located in the Boston Area, North Andover Flight Academy is A Complete Helicopter Flight Training School.

We are equipped to handle recreational and professional students utilizing the Robinson R-44 and R-22 helicopters. We combine formal ground classroom training with flight training around your individual schedule. We also provide a special program designed to reduce training time and increase the amount of knowledge transfer. This allows students to train in a larger helicopter at a reduced cost.

We are also the only Boston helicopter flight school which can offer college credits for flight hours.

Our location is ideal for training in multiple environments -- metropolitan, seacoast, and mountainous terrain are some of the nearby features.

Fixed Wing Training

North Andover Flight Academy also offers fixed wing instruction, including commercial, instrument and tailwheel transition.
